DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/22/04 has been entered.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the shape of a rectangle (claim 1) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. (The problem is that the claim recites a rectangle, and the drawing shows a trapezoid. It is suggested that applicant use wording to the effect of "substantially rectangular", "generally in the shape of a rectangle", or "has a shape substantially similar to a rectangle" in the claim. This would encompass the shape shown in figure 7 and would obviate the drawing objection.)

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure

Art Unit: 3617

is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claim 17 is objected to. Claim 17 recites the limitation "the flap means" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. It is apparent that claim 17 should depend from claim 15 instead of claim 21. This will be assumed for examination purposes. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the

Art Unit: 3617

invention. Claims 25 and 26 depend indirectly from claim 1. Claim 1 recites that the center of gravity and center of lift are substantially vertically aligned. Claim 25 recites that the center of lift moves sharply rearward. It is not described how both conditions can exist at the same time. Claim 26 recites that the center of lift moves sharply forward. Again, it is not described how this condition exists while the centers are substantially vertically aligned as recited in claim 1.

Allowable Subject Matter

6. Claims 1-24 are allowed.

Response to Arguments

7. Applicant's arguments with respect to claims 25 and 26 have been considered but are moot in view of the new ground(s) of rejection.
